

Farmowners e2Value Requirement Change

New! MAX no longer requires an e2value estimate on Coverage E buildings covered for \$25,000 or less. Review the three screenshots below for more explanation.

The first screen shot gives the option to “Save & Continue” without further action when entering a building covered for \$25,000 or less. The second screen shot shows (by the addition of the “Bypass e2value” button), that MAX requires an e2value due to the presence of the ‘large shed’ with coverage over \$25,000. Continuing without adding an e2value brings you to the pop up on the next page.
